

# Risk Management

## **Wilson, Sons Logística Risk Management is divided into two sections: Storage Depots and Distribution Centres and; Transport**

In conformity with legal requirements and the norms and regulations established by the Government and even by Non-Government concerning Safety, the principles of our Risk Management are:

- » Utilization of adequate installations, infra-structure and operational equipment.
- » Institutionalization and adherence to specific standards, procedures and contingency plans for each type of operation.
- » Institutionalization and execution of intensive training programmes

### **Distribution Warehouses and Depots**

- » Hydrant systems, fire extinguishers and fire brigades;
- » Lightning arrestors;
- » Floodgates and pumps (to combat spillage and flooding);
- » Temperature and humidity control;
- » Segregation of merchandise and compatibility control;
- » Equipment and buildings maintenance control;
- » Utilization of correct and adequate equipment for each type of operation;
- » Quarterly inspections of structural elements of company buildings, including checks on fire prevention, safety of assets and work safety, with issue of relevant reports specifying recommendations and plans for immediately implementing urgent actions;
- » 24-hour surveillance, proximity alarms, physical barriers and control of entry;
- » Unrestricted compliance with the conditions established in the insurance policy;
- » Intensive training programs

### **Insurance policies**

Wilson, Sons Logística guarantees the responsibility for damage caused to client's products, while under custody of the former, received for storage, handling, loading, unloading and despatch.

### **Transport and Distribution**

- » Registration and accreditation of the driver or owner of the 3rd party vehicle, including detailed verification of financial, criminal, civil and other circumstances;
- » Obligatory use of means of communications (radio or cell 'phone) by the driver on every trip;
- » Utilization of equipment adequate for each type of transport job;
- » Use of a tracking and monitoring equipment when necessary;
- » Obligatory prior analysis of the Wilson, Sons Safety and Security areas when dealing with the handling or transportation of certain types merchandise;
- » Confidentiality in the preparation of cargo and trip itineraries, with stopovers and rest periods forbidden in non-authorized locations, as the case may be;
- » Mandatory compliance with the preventive action schedule, especially concerning armed escorts or patrol measures, as the case may be;
- » Unrestricted compliance with the conditions established in the insurance policy;
- » Intensive training programmes
