

SOLUTION FOR THE CHEMICAL AND PETROCHEMICAL INDUSTRIES

With a well-tried project development methodology widely accepted on the marketplace, Wilson, Sons Logística bases its strategy on continued investment in training and qualifying its staff in the development of applied information technology. Not in investing in its Holdings

This policy decision enables the company to achieve excellence through management of its operations, based on precise and up-to-date information.

Additionally, the company is at liberty to propose the best solution for the client, both in terms of operational efficiency and cost, because it is not committed to large investments in assets.

Wilson, Sons is capable of planning and operating complex operations of on-site handling, storage and distribution operations. Possessors of the highest level of services in the logistics market, we think and act like an extension of your own company.

We provide highly-customised logistics solutions with the objective of meeting the specific objectives of the chemical and petrochemical industries. Without resorting to paradigms, our design engineers use all the experience gained in previous projects for the many and diverse segments of industry, searching for the most appropriate solution for the strategic objective aimed for by the client.

A profound analysis of the logistics process involved, we base our studies on existing assets and all the alternative technologies available, thereby enabling us prepare a solution with the best fit for business.

How much logistics is needed to make this scene perfect?

Wilson, Sons Logística knows !!
