

SOLUTION FOR THE OIL & GAS INDUSTRY

How much logistics is needed to make this scene perfect?

Wilson, Sons Logística knows !!.

No detail is too small for Wilson, Sons Logística.

And that's why Oil & Gas sector companies can always count on our services.

The results are always perfect.

Wilson, Sons Logística bases its strategy on continued investment in training and qualifying its staff in the development applied information technology. Not in investing in its Holdings

This policy decision enables the company to achieve excellence through management of its operations, based on precise and up-to-date information.

Additionally, the company is at liberty to propose the best solution for the client, both in terms of operational efficiency and cost, because it is not committed to large investments in assets.

We believe that by developing, implementing and operating custom-built solutions for our clients' logistics operation, they will be able to hold their focus on their own business. This is one of the ways in which Wilson, Sons Logística provides added value for its clients.

- We transform logistics into a competitive differential
- Investment in building up and qualifying our staff teams
- Synergy with academic institutions.
- Integration of academic concepts with operational realities.
- Proficiency in simulation and optimisation technologies (Simul8®, Stat-fit®, Sptquest®).
- Development of integrated solutions using custom-built projects.
- Development of tooling appropriate for operational tasks.(WMS, TMS).

SOLUTION FOR THE OIL & GAS INDUSTRY

Transport

Wilson, Sons has the capability of developing custom-built solutions that can involve marine, air and overland transport - National or international.
