

## IMPORTANT ANNOUNCEMENT

Wilson Sons informs to all their clients and stakeholders that the Company has been closely monitoring the advance of the pandemic reported by the World Health Organization, related to the spread of COVID-19 (new coronavirus). The Company's operations continue to occur normally, following some protective measures implemented in all its business units.

A technical crisis committee has been created to manage the actions resulting from this pandemic and established the following measures:

- . International and national business travel has been prohibited.
- . Employee participation in external events has been prohibited.
- . Meetings with executives who have recently returned from international travel must be held remotely or rescheduled.
- . Home isolation to all employees recently returning from international travel.
- . All our operations and facilities have implemented a work from home routine for administrative staff.

Some additional measures have been taken to ensure the safety and health of employees, customers and stakeholders:

- . Ventilation of our businesses environments has been designated for certain times.
- . In facilities where there is food supply (restaurants), the usage time was flexibilized, in order to reduce the agglomerations.
- . The employees were instructed to not stay in the restaurants after the end of the meal.
- . We have increased the availability of alcohol gel 70% in all our operations.
- . Cleaning and hygiene measures have been intensified.
- . Common areas of the Company's offices and facilities were flagged with helpful prevention tips.

As of today, none of our employees have been tested positive for the disease. The Company is closely monitoring the evolution of the virus in the country and the development of the situation.
